

Hi, it's Matthew again. Here's my re-upload for sugarlabs.org website! The front page has an amazing design but I have a suggestion for the slider (the big header on the home page). I think you should add a background video/picture for more color.

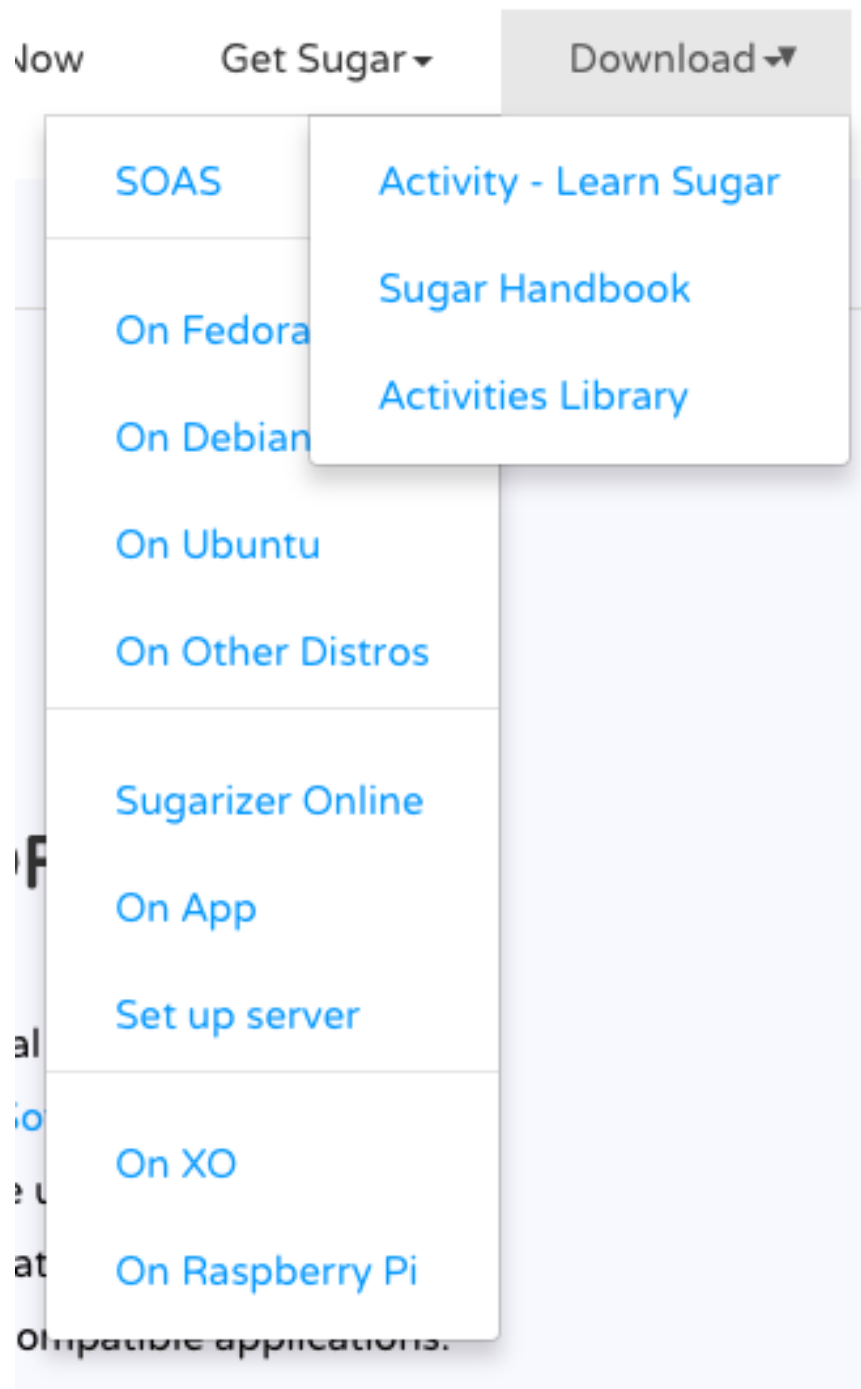

For this section of the home page, I thought the description was very nice. However, I'm not sure if this is supposed to be a video I can watch, if it is, it isn't working.

Also, in the navigation bar, once I click on a page it has a weird deformed arrow next to the original arrow as shown here.

I can also click on multiple pages but the other one wouldn't close as shown below.

Other than that, the website looks nice! Again the things that seemed most sketchy were the navigation bar and the video on the home page.
